

Graphic design is life changing; it is one of the most powerful visual tools available today. Since the young age of twelve years old computers and the visual arts fascinated me. In order to stay on track with what I loved, I pursued a degree in Digital Media Graphics & Web at IRSC. Under the guidance of some of the most experienced professors I was awarded a Bachelor of Applied Science Degree for Digital Media. Fortunately I have been able to express my creative touch while representing numerous large companies and organizations. To me graphic design is not just a career, design is my life.
